

DivAndMod Error Log:

Error	Cause	Fix
Average always an integer	Used <code>total / 5</code> (integer division)	Changed to <code>total / 5.0</code> (real division)
Wrong output format	Forgot to add <code>%%</code> when printing percent	Corrected to <code>%.1f%%\n</code>
Loop error	Accidentally used <code>i < 5</code> instead of <code>i <= 5</code>	Changed loop condition to <code>i <= 5</code>
